2010 PRODUCT CATALOG

www.cmcsupply.com

\$10.00

To: Our Valued Customers

CMC Supply is pleased to offer you our 2010 product catalog. In 1978 we began with a single mission; to deliver the best possible service to our customers. After 32 years this strategy has served us well. We are committed to provide our customers with quality product offerings, outstanding service and exceptional support.

CMC is locally owned and operated and shares with our employees and customers a strong sense of community. Because of this, our mission is to provide the best possible service to our customers and have chosen the following items to explain how we define service.

- CMC represents the leading manufactures of plumbing, water system, excavating and water and sewer utility materials. We maintain a full and plentiful inventory of each product line for your needs.
- We provide a knowledgeable outside, inside, showroom and counter staff to assist you in product selection and technical information. Our support representatives average more than 15 years of industry experience, providing another valuable tool to assist you with your business.
- Our delivery schedule includes deliveries twice weekly to the majority of our trading areas. When special needs arise, we will utilize any employee to deliver in an emergency.
- Our plumbing showrooms in Roanoke and Christiansburg, Virginia are kept up to date with the latest innovations and are staffed with specialists trained in interior design and experienced with home building, remodeling and renovation processes.
- CMC is a WIT and Baron Group Member giving us One Billion dollars in buying power that enables us to offer market competitive pricing on quality material.

We appreciate your business and realize our relationship comes with responsibility. We welcome the opportunity and privilege to serve you.

	15	0	0	0	0	170*	270*	430	660	820	

- (1) This table is based on copper wire. If aluminum wire is used it must be two sizes larger.
Example: When the table calls for #12 copper wire you would use #10 aluminum wire.
- (2) Standard single phase control boxes may be connected at any point of the total cable length.
The portion of the cable between the service entrance and a single phase control box with a line contactor cannot exceed 25% of the total cable length to assure reliable contactor coil operation.

THREE PHASE MOTOR MAXIMUM CABLE LENGTH (motor to service entrance) (3)

- (3) The lengths without an * meet the code for either 60° or 75° C individual conductors or jacketed cable. Flat molded and web cable is considered jacketed cable.
- Lengths marked * meet the U.S. National Electrical Code ampacity only for individual conductor 60° or 75° C cable, in free air or water, not in a magnetic enclosure or conduit.
- The portion of the cable between the service entrance and a three phase starter cannot exceed 25% of the total cable length to assure reliable contactor coil operation.

THIS CHART GIVES FRICTION LOSSES FOR YOUR GIVEN FLOW RATE PER 100 FEET OF PIPE. EXAMPLE: IF YOU HAVE 60 GALLONS PER MINUTE AND YOU'RE USING 2 INCH SCHEDULE 80 PIPE AND YOU HAVE A 160 FEET OF PIPE, YOUR FRICTION LOSS IS 8.12 x 1.6 = 12.99 FEET.

NOTE: IT IS BEST TO KEEP YOUR FRICTION LOSS (PER 100 FEET OF PIPE) TO LESS THAN 5 FEET.

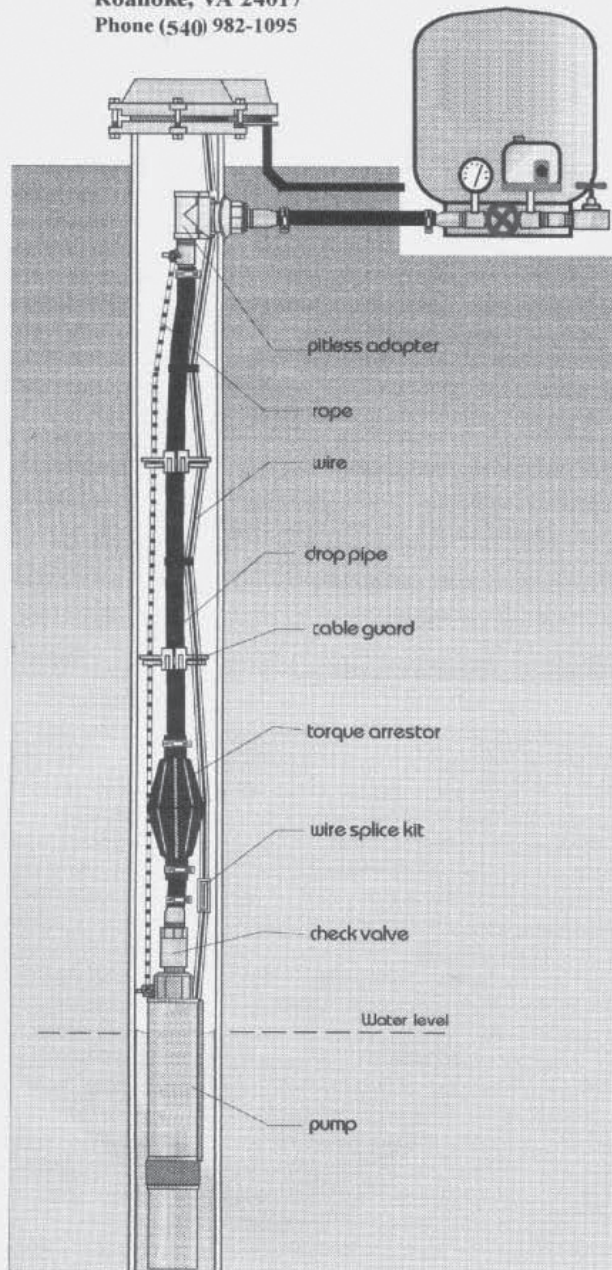

FRICITION LOSS IN PVC FITTINGS IN EQUIVALENT FEET OF STRAIGHT PIPE

CMC Pump Kit

Pump kit for submersible pump installation with tanks that have 1" connection.

Kit Contents:

1.....703 Tank Tee
1.....FSG24060 Switch
1.....GA100 100# Gauge
1.....BRN025X300 ¼" X 3" Brass Nipple
1.....BOILERD050 ½" Boiler Drain
1.....BR075X200 ¾" X 2" Brass Nipple
1.....BVB075XIPS ¾" IPS Brass Ball Valve
1.....BR1A100X075M 1" X ¾" Brass MA
3.....BR1A100M 1" Brass MIP Adapter
10.....H16SS Clamps
1.....ETAPE Electrical Tape
1.....TTAPE050X260 ½" X260" Teflon Tape
1.....TS48 Torque Arrestor
5.....WG6 Cable Guards

Pitless Adapter Kit

Pitless Adapter Kit for Underground Tank.

Kit Contents:

1.....1840TAP Pitless Adapter with Hole
1.....Air Hose 1/4" X 6'
1.....BRN025 ¼" Brass Tee
1.....BRN023X300 ¼" X 3" Brass Nipple
1.....GA100 100 PSI Gauge
1.....1/4" X ¼" MIP Barb 90 Deg
1.....1/4" Barb X MIP Adapter
1.....FSG24060 40/60 Pressure Switch
2.....MM4SS Mini Hose Clamps

708TP Tank Tee Kit

Kit Contents:

1.....708 Tank Tee
1.....FSG4060 40/60 Pressure Switch
1.....GA100 100 PSI Gauge
1.....BRN025X300 ¼" X 3" Brass Nipple
1.....BOILERD050 ½" Boiler Drain
1.....RV50 ½" Relief Valve

703TP Tank Tee Kit

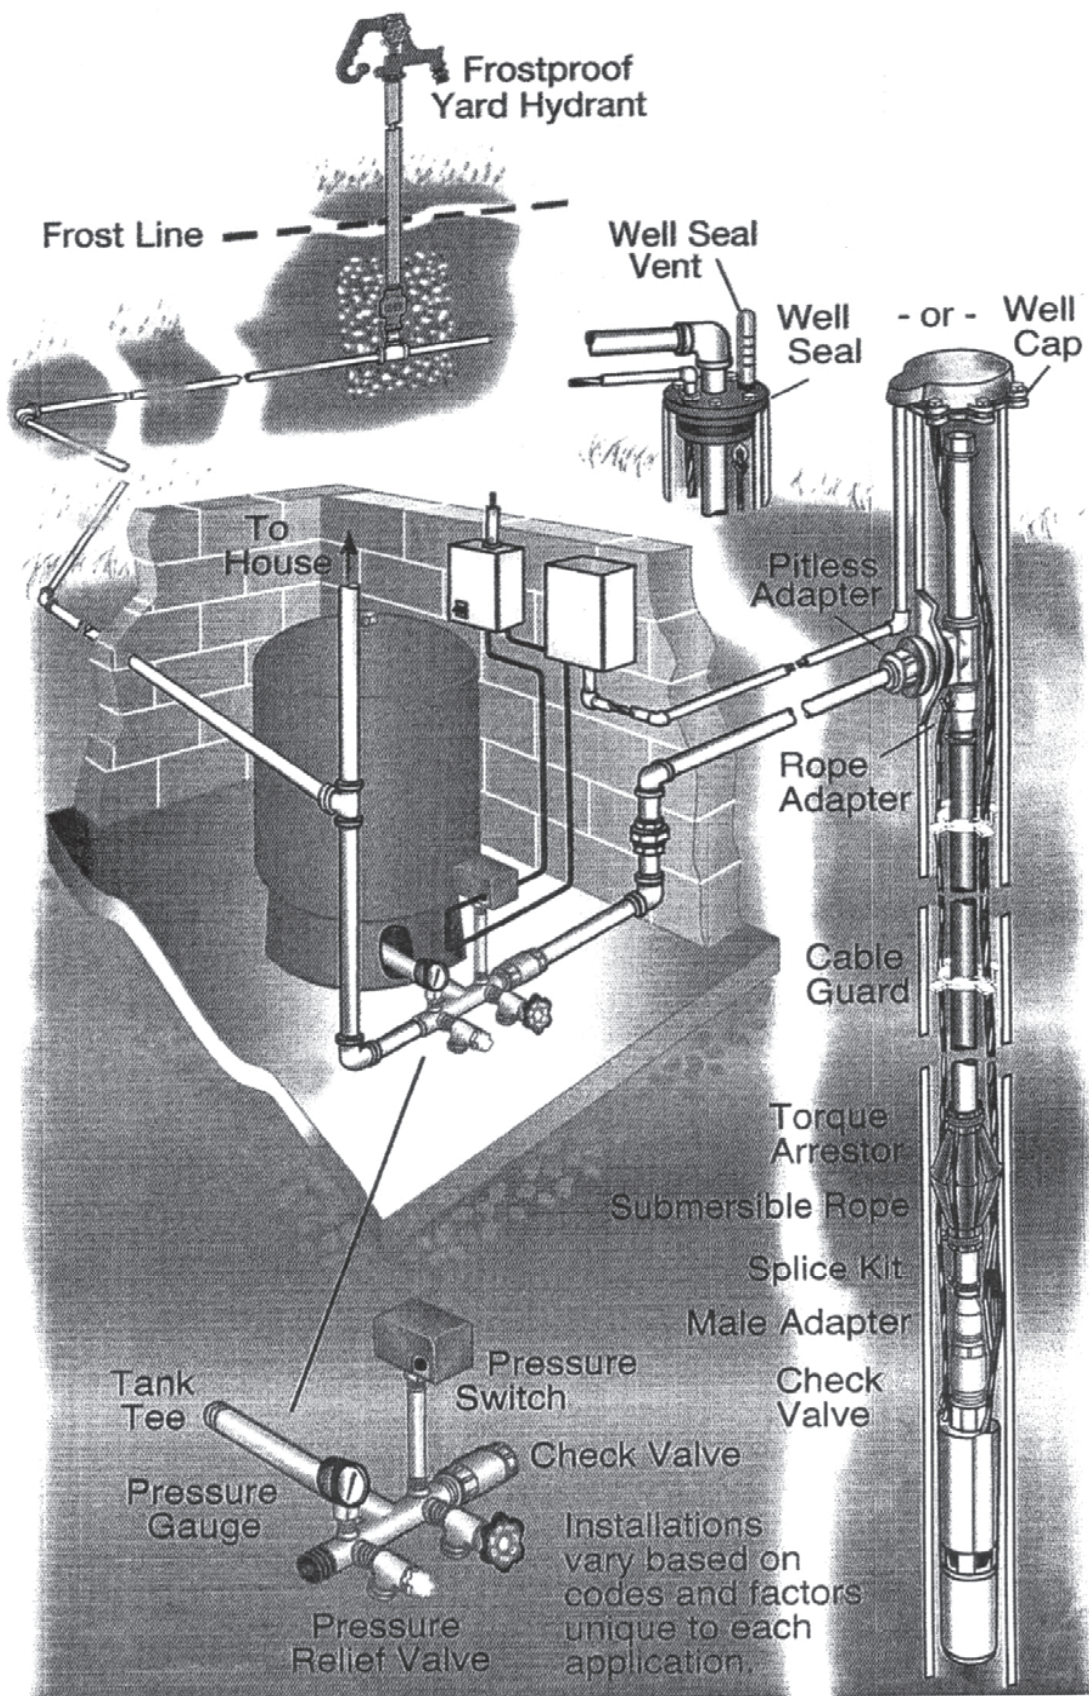

Kit Contents:

1.....703 Tank Tee
1.....FSG4060 40/60 Pressure Switch
1.....GA100 100 PSI Gauge
1.....BRN025X300 ¼" X 3" Brass Nipple
1.....BOILERD050 ½" Boiler Drain

713 Tank Tee Kit

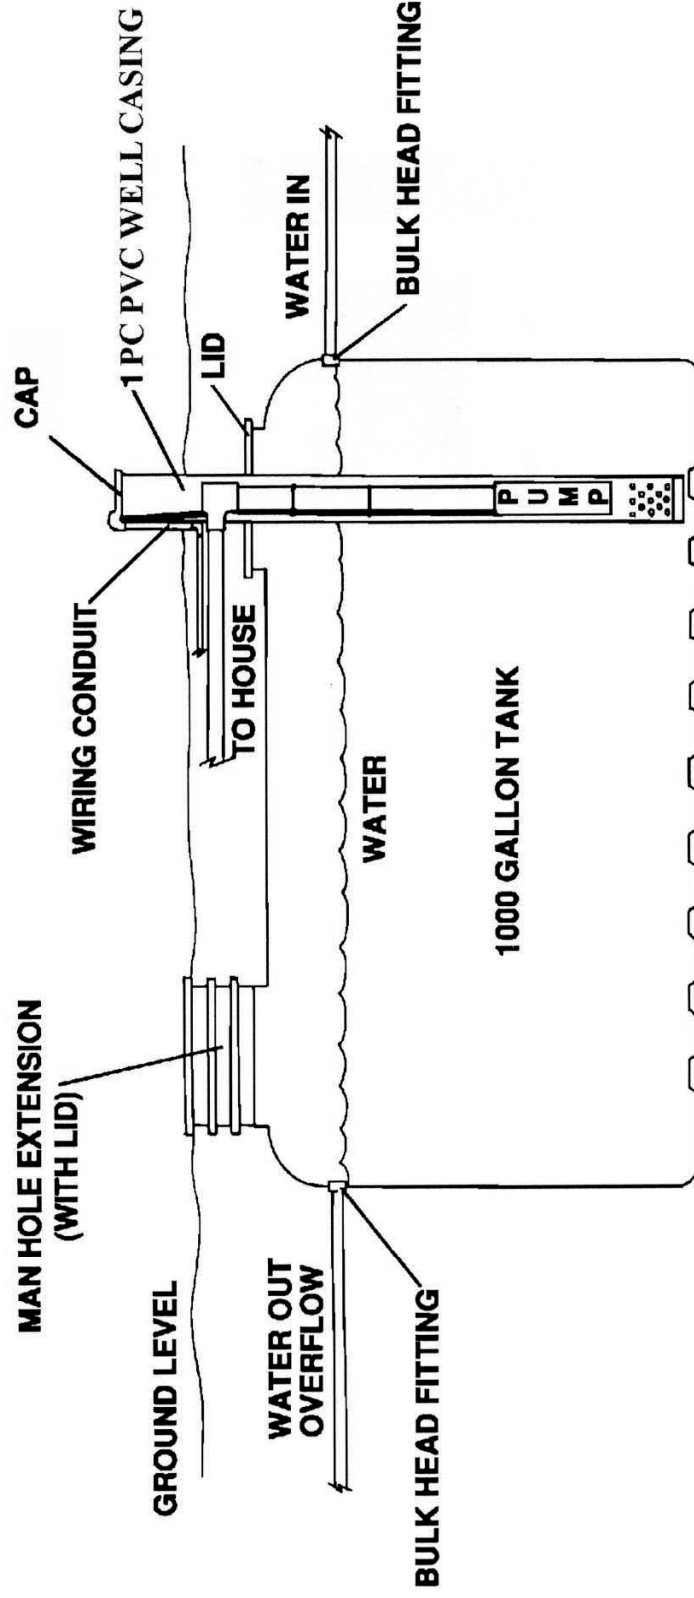

Kit Contents:

1.....713 Tank Tee
1.....FSG4060 40/60 Pressure Switch
1.....GA100 100 PSI Gauge
1.....RV75 ¾" Relief Valve
1.....BRN025X300 ¼" X 3" Brass Nipple
1.....BOILERD075 ¾" Boiler Drain

Suggested Installation - 1000 Gallon Water Storage Tank

2510 Johnson Avenue, N.W., Roanoke, Va. 24017

Mailing: P.O. Box 12058, Roanoke, Va. 24022-2058

(540) 982-1095

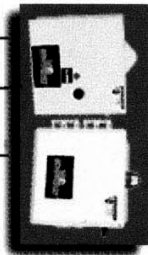

FAX: (540) 342-8048

WATER STORAGE TANK INSTALLATION

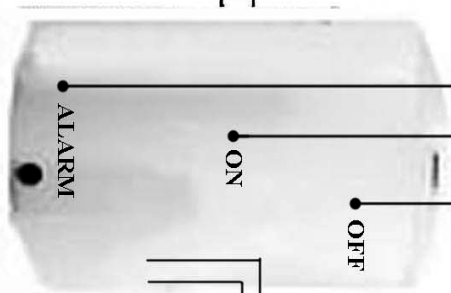

Pump-Tec will prevent run dry

Simplex Control for well pump (Solenoid and float may be substituted)

From Well

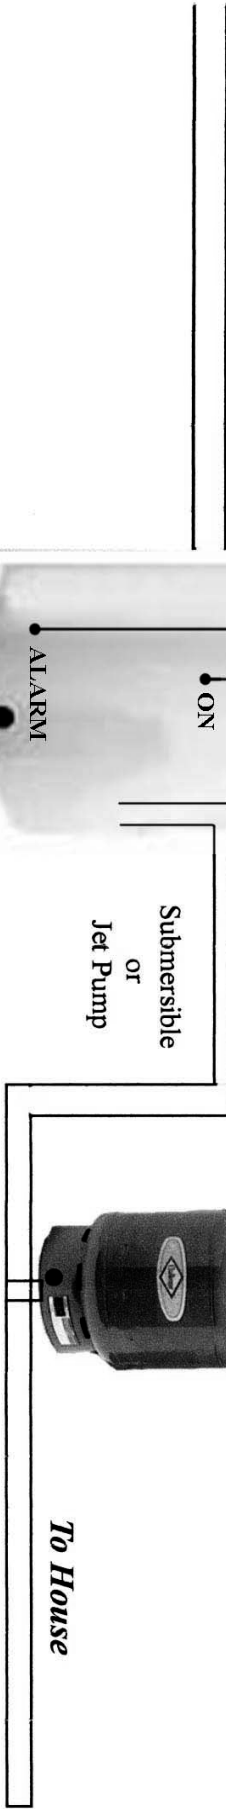

300 Gal Tank
(or any size tank)

Submersible
or
Jet Pump

Challenger Tank

To House

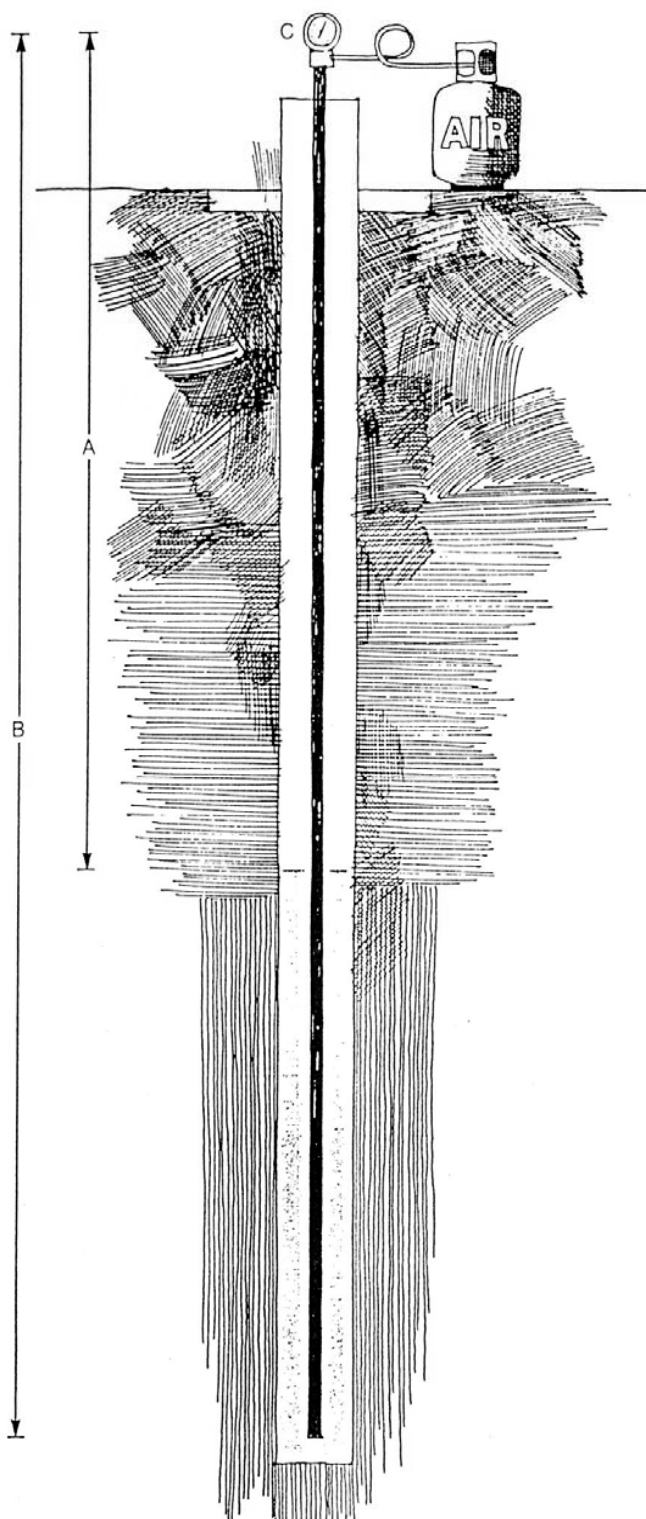

How to determine the water level

Install $\frac{1}{8}$ " or $\frac{1}{4}$ " tubing long enough to be 10' to 15' below low water level. Measure the tubing length as it is lowered into the well.

Once the tubing is fixed in a stationary position at the top, connect an air line and pressure gauge. Add air to the tubing until the pressure gauge reaches a point that it doesn't read any higher. Take a gauge reading at this point.

- A. Depth to water (to be determined).
- B. Total length of air line (in feet).
- C. Water pressure on air tubing.
Gauge reads in pounds. Convert to feet by multiplying by 2.31.

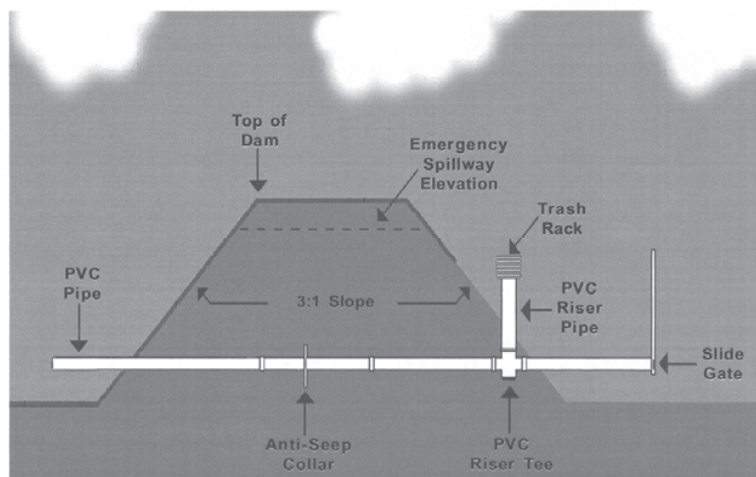

Example: If the air tube is 100' long, and the gauge reads 20 lbs. . . .
 $20 \text{ lbs.} \times 2.31 = 46.2 \text{ ft.}$
Depth to water = 100 ft.
minus 46.2 ft. = 53.8 ft.

Whether you want a 1/2 acre or a 500 acre pond we have the products you need. We offer high quality pipe fittings and valves for the aquaculture industry. To ensure the strength and durability of our products we have included extensive testing and quality control throughout all of our manufacturing processes.

Conventional Pond System

Recommended Pipe System Sizes

Run Off Only				Bold Stream				
Drainage Area	Riser	Tee	Thru Pipe	Gate	Riser	Tee	Thru Pipe	Gate
5-50Acres	8"		6"	6"	8"		10"	6"
50-100Acres	10"		8"	6"	10"		12"	8"
100-200Acres	12"		10"	8"	12"		15"	8"
200-300Acres	18"		12"	8"	18"		24"	10"
300-500Acres	24"		18"	12"	24"		18"	12"

Aerators

A healthy pond requires oxygen to support plant and aquatic life. Mother Nature supplies some aeration during each rain event, but she sometimes requires assistance. As a pond ages, the water begins to stratify where the deeper water loses oxygen. Left unattended, this layer of deoxygenated water will rise and aeration becomes essential. Call us for additional information, sizes and pricing.

What if satisfying the customer was as easy as turning on the water?

Even when flow requirements vary, Goulds Pumps efficiently delivers constant pressure and reliability thanks to the Balanced Flow Submersible Pump Controller and the GS Submersible Pump. The Balanced Flow provides the right pressure for showers, irrigation systems, washing machines and dishwashers, even when more than one appliance is in use. The GS Submersible Pump with the Guardian System and CentriPro motor delivers quiet, efficient and long-lasting performance in some of the world's toughest submersible applications.

The result is that your customers have all the flow they need at the pressure they want, and you have a system you can feel confident installing nearly anywhere.

With 160 years of reliability and guaranteed quality behind them, Goulds Pumps are always an easy choice. Find out more at www.goulds.com

STYLE that works better.

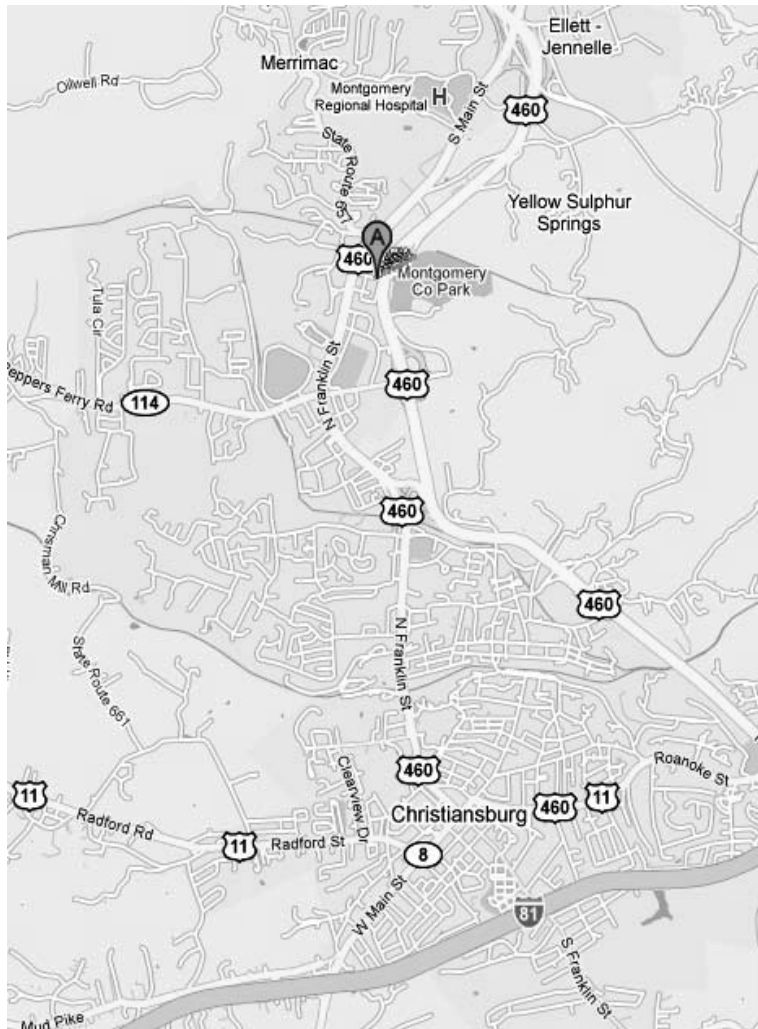

The Cadet® 3 toilet boasts the highest performance rating, making it the no-nonsense, worry-free, completely reliable choice. Designed smarter for higher performance, the 3" opening and direct fed jet move water into the bowl over 80% faster than the industry standard 2" flush valve. Plus, the trapway has no choke points, which means fewer clogs. At American Standard, function's in fashion.

To learn more, visit us at americanstandard.com. American Standard bath and kitchen products, ask for them by name.
